SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on Hwy 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.
- Pfeiffer Big Sur State Park reopened to the public on 07/01/17.
- Julia Pfeiffer Burns State Park, Andrew Molera State Park, and Highway 1 at Pfeiffer Canyon Bridge remain closed.
- Effective 07/01/17, there is a shuttle available until the Pfeiffer Canyon Bridge reopens.

Mud Creek Slide, State Route 1, Monterey County

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- Remains fully closed in both directions at Mud Creek due to continued slide activity. Delivery vehicles and local residents will need to use Nacimiento-Fergusson to exit south or to clear the access times at Paul's Slide. Local residents and delivery vehicles only; the only access to the public is accessing on Highway 1, using Nacimiento-Fergusson, will be to Gorda (PM 10) to the south, and to Limekiln State Park (PM 20.76) to the north.
- Estimated opening date is 06/01/18.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

***** Thunderstorms Northern and Eastern areas through Early Wednesday *****

Low pressure near the northern CA coast has pulled cool, moist, and unstable air into the region from the south. Temperatures will be near normal through Wednesday. Thunderstorms will be mainly focused in northern and eastern areas, and will gradually produce more rainfall. The marine layer is only about 1500-2000 ft deep and moderate onshore flow will bring cool humid marine air inland to more areas.

Storms will produce a mixture of wet and dry strikes today and mostly wet strikes tonight through early Wednesday. The main area for thunderstorms will reach as far west as western Siskiyou County, northeastern Trinity County, and northern and northeastern Shasta County, and all areas from the Cascade-Sierra crest east. Isolated thunderstorms are remotely possible at lower elevations farther west as well. As the moisture increases over the area tonight through early Wednesday the storms will produce more rainfall, reducing the threat of dry strikes and new ignitions. Strong gusty outflow winds are possible with any thunderstorm. Dry SW flow will return by late Wednesday and continue through the end of the week and over the weekend.

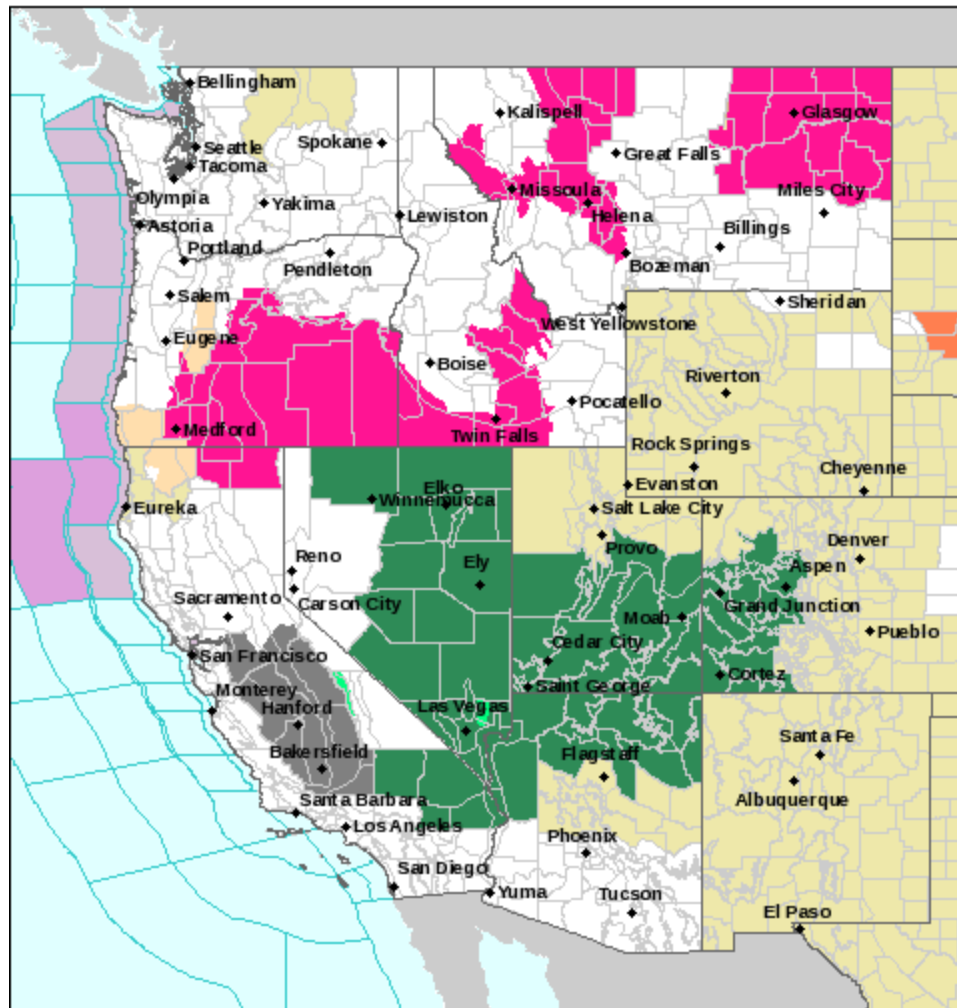

SOUTHERN CALIFORNIA

***** Scattered thunderstorms through Tuesday *****

Scattered showers and thunderstorms will develop over the mountains and deserts through Tuesday afternoon as abundant moisture comes up from the south. Some shower and thunderstorm activity will also occur over coastal and valley locations of Southern California through this afternoon, especially across San Diego County. Temperatures will be near normal through Tuesday, with upper 70s and 80s across the mountains and upper 80s and 90s in the valleys. Minimum humidity will be above 20% across Central California and above 30% across Southern California through Tuesday. High pressure currently over New Mexico and Texas will strengthen and expand westward bringing a warming and drying trend to the region Wednesday through the end of this week. Isolated afternoon thunderstorms will be possible over the Sierra Crest and over the mountains and deserts of Southern California east of I-15 Wednesday. High pressure will move northward into the Great Basin which will increase moisture from the southeast and bring scattered showers and thunderstorms back to the mountains and deserts this weekend. Temperatures will cool back to near normal this weekend as moisture increases.
